Applications sold by Technology Pack	License Price		Software Update License & Support		Licensing Metric	Minimum
Customer Data Management	**List Price**	**GSA Price**	**List Price**	**GSA Price**		
Customer Data Hub [14]	100,000	48,362.72	22,000.00	10,639.80	Processor	1
Health Care						
Healthcare Transaction Base[14]	1,000	483.63	220.00	106.40	Named User Plus	50
	100,000	48,362.72	22,000.00	10,639.80	Processor	1

The GSA Prices set forth above in Table 1 are perpetual license prices. Term licensing is available for all Oracle Products listed in Table 1. The GSA price for a term license is based on a specific percentage of the GSA perpetual license price. Annual term licenses are available from 1 to 5 years: 1 year - 20% of GSA perpetual license price; 2 year - 35% of GSA perpetual license price; 3 year - 50% of GSA perpetual license price; 4 year - 60% of GSA perpetual license price and 5 year - 70% of GSA perpetual license price; Support for all term licenses is 22% of GSA net perpetual license price. Exception: support fees for the Collaboration programs are 25% of GSA net perpetual license price. The price for Technical Support is the same whether the software license is perpetual or term. Example: The GSA price for a 2-year term license with 12-months of Technical Support for 1 processor of Oracle Database Enterprise Edition would be $10,944.00 (License: $19,200.00*0.35 = $6,720.00; Support: $4,224.00)

Oracle Technology Footnotes

[1] If licensing by Named User Plus, the minimum is 10 Named User Plus licenses per Processor.

[2] Enterprise Edition Options & Enterprise Managers must match the number of licenses of the associated Oracle Database Enterprise Edition. In addition, a minimum of 25 Named User Plus licenses per Processor must be met. Associated Database is defined as the database(s) which is (are) being managed by the option.

[3] Application Adapters are available for: PeopleSoft, SAP, Siebel & JD Edwards.

[4] Mainframe and TP-Monitor Adapters are available for: CICS, IMS/DB, IMS/TM, VSAM, BeanConnectand Tuxedo.

[5] Oracle Database Standard Edition can only be licensed on servers that have a maximum capacity of 4 single core processors. For multicore chips, the maximum number of cores per server is determined by multiplying the core processor licensing factors (as contained in the processor definition) by the number of cores. The result must be less than or equal to 4 and the total number of cores must be less than or equal to 8. If licensing by Named User Plus, the minimum is 5 Named User Plus licenses.

Additionally, it may be licensed on a single cluster of servers supporting up to a maximum of four single-core processors per cluster (2 2-way nodes, 4 1-way nodes, and 1 1-way and 1 3-way). For multicore chips, the maximum number of cores per cluster is determined by multiplying the core processor licensing factors (as contained in the processor definition) by the number of cores. The result must be less than or equal to 4 and the total number of cores in the cluster must be less th or equal to 8.

[6] 2, 3, 4 and 5-Year Term Licenses are not available for Collaboration products. Ordering Activities must purchase Software Updates when purchasing Product Support.

[7] If licensing by Named User Plus, the minimum is 25 Named User Plus licenses per Processor.

[8] Personal Edition provides a maximum of one Named User Plus per database.

[10] Oracle Standard Edition One may only be licensed on servers that have a maximum capacity of 2 single core processors. For multicore chips, the maximum number of cores per server is determined by multiplying the core processor licensing factors (as contained in the processor definition) by the number of cores. The result must be less than or equal to 2 and the total number of cores must be less than or equal to 4. If licensing by Named User Plus, the minimum is 5 Named User Plus licenses.

[11] Internet Application Server Managers must match the number of licenses of the associated Internet Application Server (Excluding TopLink and Application Development Framework, for which these Manager Packs cannot be licensed).

An associated Internet Application Server is defined as the Internet Application Server(s) which is (are) being managed by the option.

[12] Java Edition, Standard Edition One and Standard Edition Options must match the number of licenses of the associated Oracle Internet Application Server Edition. Associated Application Server is defined as the application server(s) which is (are) being managed by the option.

[14] For the purpose of licensing Healthcare Transaction Base, only the processors on which IAS Enterprise Edition and this program are installed and/or running are counted for the purpose of determining the number of processors required to license this program. For the purpose of licensing Customer Data Hub, only the processors on which Oracle Database Enterprise Edition and this program are running in production are counted for the determining the number of licenses required to license this program.

[15] Internet Application Server Enterprise Edition Options must match the number of licenses of the associated Internet Application Server. Associated Application Server is defined as the application server(s) which is (are) being managed by the option.

[16] Internet Application Server Standard Edition One may only be licensed on servers that have a maximum capacity of 2 single core processors. For multicore chips, the maximum number of cores per server is determined by multiplying the core processor licensing factors (as contained in the processor definition) times the number of cores. The result must be less than or equal to 2 and the total number of cores must be less than or equal to 4. If licensing by Named User Plus, the minimum is 5 Named User Plus licenses.

[22] Application Development Framework requires a runtime license. This can be purchases via Toplink and Application Development Framework or Java Edition

[23] XML Publisher is also licensable via the per employee metric. The price is 40.00 USA (Dollar) per employee when licensed as a standalone product and 30.00 USA (Dollar) per employee when licensed as an option to the Application Server Enterprise Edition.

[24] The Named User Plus Minimum does not apply if the program is installed on a one processor machine that allows for a maximum of one user per program.

[25] Plug-in available for BEA WebLogic, IBM WebSphere, Microsoft Active Directory, Microsoft .NET, Microsoft Internet Information Services (IIS), Microsoft ISA Server, Microsoft Commerce Server, Microsoft BizTalk Server

[26] Plug-in available for F5 Load Balancers, Juniper Netscreen Firewall, Check Point Firewall

[27] Plug-in available for NetApp Filers, EMC NS Series NAS

[28] Connectors are not available at this time

[29] The number of Options licenses must match to the number of licenses of the parent product

[30] If licensing by Named User Plus, the minimum is 25 Named User Plus licenses per Processor.

[31] Rdb Server Options must match the number of licenses of the associated database.

[32] TRACE may also be licensed with CODASYL DBMS.

[33] Oracle precompilers supported via SQL*Net for Rdb for use across Oracle & Rdb Servers.

[34] CDD/R Runtime is an unlimited use license for applications requiring CDD/R deployment licenses.

[35] Following is the list of available Xellerate Identity Provisioning Connectors: Database User Management, Database Applications Table, Microsoft Active Directory, Oracle Internet Directory, Novell eDirectory, Sun Java System Directory, Oracle e-Business, PeopleSoft Enterprise Applications, SAP Enterprise Applications, Microsoft Exchange, Novell Groupwise, Microsoft Windows, UNIX, RSA Authentication Manager, RSA ClearTrust, IBM Lotus Notes/Domino, SAP Enterprise Portal, Siebel Enterprise Applications, IBM RACF, CA ACF2, CA Top Secret, BMC Remedy User Management

[36] Plug-in available for IBM DB2, Microsoft SQL Server

[37] Secure Enterprise Search may also be licensed on per employee metric. The minimums for employee licensing is 200 employee licenses. The price is $30 USA Dollar per employee. When licensing by named user plus metric, the minimums are 100 Named User Plus licenses

[38]

The minimums for this product are 50 Named User Plus licenses. The number of options licenses must match the number of licenses of the associated Business Intelligence Server Enterprise Edition.

[40] Warehouse Builder Connectors are only licensable with Oracle Database Enterprise Edition. Warehouse Builder Connectors are available for: PeopleSoft, Oracle E-Business Suite, and SAP. The Connector licenses do not need to match to the Database Enterprise Edition licenses.

[41] The Oracle Database Lite RDBMS also known as "Clients" are free of charge for licensing purposes.

Table 2 - Oracle E-Business Suite Program Licenses

The GSA Prices set forth above in Table 2 are perpetual license prices. Term licensing is available for all Oracle Products listed in Table 2. The GSA price for a term license is based on a specific percentage of the GSA perpetual license price. Annual term licenses are available from 1 to 5 years. 1 year - 20% of GSA perpetual license price; 2 year - 35% of GSA perpetual license price, 3 year - 50% of GSA perpetual license price; 4 year - 60% of GSA perpetual license price and 5 year - 70% of GSA perpetual license price. Support for all term licenses is 22% of GSA net perpetual license price. Exception: support fees for the Collaboration programs are 25% of GSA net perpetual license price. The price for Technical Support is the same whether the software license is perpetual or term. Example The GSA price for a 2-year term license with 12-months of Technical Support for 1 processor of Healthcare Transaction Base would be $27,360.00 (License: $48,000.00*0.35 = $16,800.00; Support: $10,560.00)

Oracle E-Business Suite Footnotes

[1] An option must be licensed at the same level (or greater than) as its parent. Example: number of Flow Manufacturing users = number of Discrete Manufacturing users. If the parent has multiple metrics, the option must be licensed at the same level as its parent for each metric. Example: number of Advanced Pricing users = number of Order Management users AND number of Advanced Pricing Electronic Order Lines = number of Order Management Electronic Order Lines.

[2] Primary Usage: is defined as each User of the following applications: Financials, Discrete Manufacturing, Process Manufacturing, Project Costing and Purchasing. Each such User is counted only once based on primary usage. Ordering activity must specify how many Users ordering activity is licensing for each application. Primary Usage of one of the applications listed above provides the User with the right to use any or all of the other application programs listed above for which order activity is licensed. Primary Usage does not provide ordering activity with the right to use other application programs including the extensions or options to the application programs listed above.

[3] Order Management is licensed based upon the number of application users AND the number of order lines entered from any source other than those entered by licensed Order Management Users. Order Management User licenses are required for all individuals who are using Order Management. In addition, any order that is entered electronically into Order Management must be licensed using the Electronic Order Line metric. This applies to order lines originating in iStore, Quoting, EDI/XML transactions, legacy applications or any other source. (Order lines entered manually by the licensed Order Management users are covered under the Order Management User license)

[4] For the purpose of licensing this program (except Healthcare Transaction Base and Customer Data Hub), only the processors on which iAS Standard Edition and/or Enterprise Edition and this program are running are counted for the purpose of determining the number of processors required to license this program.

For the purpose of licensing Healthcare Transaction Base, only the processors on which iAS Enterprise Edition and this program are installed and/or running are counted for the purpose of determining the number of processors required to license this program. For the purpose of licensing Customer Data Hub, only the processors on which Oracle Database Enterprise Edition and this program are running in production are counted for the determining the number of licenses required to license this program.

[6] The number of Applications Users for Tutor for Applications must match the number of Application Users of each Application for which the ordering activity is using Tutor. If the application is licensed with a metric based on all the individuals in an organization, i.e., Person, Employee, then everyone in the LOB or organization must be licensed using the Self Service Tutor for Applications. If the application is licensed with any other metric, i.e., Purchase Line, Order Line, then the number of Application Users for Tutor for Applications must match the number of Application Users that the ordering activity would have licensed for the application, had this metric been available.

[6] Configurator can be licensed by Application User OR by Processor. If licensing by Application User, then the actual users accessing Configurator must be counted. If the user population accessing Configurator is uncountable, then the Processor metric must be used.

[7] If licensed with Clinical, the total number of application users and application read-only users of Thesaurus Management System must match the number of application users of Clinical. If licensed separately, the minimum of application users for Thesaurus Management System is 1, the minimum of application read-only users is 5.

[8] Ordering activities must pay for both the module and the subscriber/workstation fee.

[9] Separate Remote Data Capture licenses are required for remote site-based data entry. In-house entry users require Clinical licenses. Remote Data Capture is licensed by Application User when the annual CRF Page volume cannot be estimated, or if it is more cost effective.

[11] See Appendix III

[13] If Managed Assets are $10 billion or less, the price per $M in Managed Assets is 2,000. If Managed Assets are greater than $10 billion, the price per $M in Managed Assets for the first 10,000 licenses is 2,000, and the price per $M in Managed Assets for each additional license is 1,000.

[15] Where Inventory Management is licensed across multiple plants or warehouses, the Inventory Management options (Mobile Supply Chain Applications, Warehouse Management, Transportation) can be licensed individually for each plant/warehouse. Within each plant/warehouse using the Inventory option, the option must be licensed at the same user count as Inventory Management or the actual user count, whichever is greater.

[16] Where Discrete Manufacturing is licensed across multiple plants, the Discrete Manufacturing options (Mobile Supply Chain Applications, Flow Manufacturing, Manufacturing Scheduling) can be licensed individually for each plant. Within each pla using the Manufacturing option, the option must be licensed at the same user count as Discrete Manufacturing or the actual user count, whichever is greater.

[17] Where Projects is licensed across many lines of business, the Project Billing option to Project Costing can be licensed individually for each line of business using the Oracle Projects solution. Within each line of business using the Project Billing option, the option must be licensed at the same user count as Project Costing.

[19] 2, 3, 4 and 5-Year Term Licenses are not available for Collaboration products. Customers must purchase Software Updates when purchasing Product Support.

[20] Where Process Manufacturing is licensed across multiple plants, the Process Manufacturing options can be licensed individually for each plant. Within each plant using the Manufacturing option, the option must be licensed at the same user cou as Process Manufacturing or the actual user count, whichever is greater.

[21] Sales Contracts Application User licenses are required for all contract administrators, legal staff, order administrators and sales personnel who manage the contracts library or author contracts.

[22] When licensing User Productivity Kit, ordering activity must license at least one UPK Developer and either UPK Users or UPK Employees.

[23] Term Licenses are not available for User Productivity Kit.
